EDUCATION

The Ohio State University

B.S. Mechanical Engineering, Robotics Minor

May 2026

QUALIFICATIONS

Mechanical Design

- SolidWorks, engineering drawing, mechanism design, electromechanical integration

Fabrication and Testing

- 3D printing, lathe and milling, precision measurement, technical documentation

Controls and Analysis

- MATLAB, LabVIEW, Python, C++, Arduino

EXPERIENCE

CRP Industries

May 2025 - August 2025

Product Development Assistant Internship

Cranbury, NJ

- Supported head of product development in identifying new product line opportunities in automotive aftermarket
- Researched part failure patterns to recommend bundled offerings commonly replaced together during auto repairs
- Forecasted opportunities for electrical components entering the aftermarket based on their lifecycle
- Tracked supplier outreach and competition research using Excel

Valcor Engineering Corp.

May 2024 - August 2024

Production Testing Support Engineer Internship

Springfield, NJ

- Organized drawings and rewrote testing documentation for Aerojet fill/drain valve
- Constructed and implemented high pressure solenoid actuation testing on Aerojet valve
- Assembled valves from multiple client programs across Valcor's product line
- Performed solenoid actuation testing and Blue Origin quick disconnect valve test setup

RELEVANT PROJECTS

CBI Rat Testing Chamber | Multidisciplinary Capstone

August 2025 - May 2026

- Designed motorized internal-door mechanism in SolidWorks for OSU's neuro lab, built steel/3D printed parts
- Developed door controls, selected, assembled and tested electrical components for door actuation
- Refined CAD models, and tuned door controls to ensure smooth, consistent, well-timed door actuation
- Documented design process for client/stakeholder needs, and budget and time considerations

Robotic Gripper Arm

January 2025 - May 2025

- Designed and built a 4-DOF robotic arm for object manipulation and path-following
- Modeled the mechanism in SolidWorks and fabricated custom components using 3D printing
- Integrated servo and stepper motors with Arduino using forward and inverse kinematics

Air Motor Piston Fabrication Project

March 2024 - May 2024

- Machined piston components using lathe, drilling, and milling techniques based on given designs
- Applied precision measuring and machining skills, working within project tolerances

Automated House Plant Irrigation System

January 2024 - March 2024

- Designed and built automated Arduino-based watering system with real-time moisture sensing
- Planned circuitry, programmed controller, built housing, tested and tuned moisture threshold and dispenser timing

LEADERSHIP AND INVOLVEMENT

Lunabotics Club

Autumn 2024 – Spring 2025

- Mechanical team member, collaborated in claw and arm design for University Rover Challenge 2025

Sigma Epsilon Phi (Greek cultural heritage club)

Autumn 2020 – Spring 2026

- Participated in cultural and volunteer activities such as food drives and community fundraisers

OCF Club (Orthodox Christian Fellowship)

Autumn 2024 – Spring 2026

- Engaged in faith based discussions and organized community service projects

Eagle Scout Award and Project:

July 2020

- Led church landscaping and infrastructure project, revitalizing courtyards, planting, mulching, installing benches
